## SUMMARY

---

Aspiring software engineer specializing in backend development for microservice architecture.

## EDUCATION

---

- **Bachelor's Programme in Software Engineering** [↗](#) *Sep 2021 — Jun 2025*
- **Route256 program for beginner backend go developers from Ozon** [↗](#) *Feb 2023 — May 2023*
- **IT School Samsung** [↗](#) *2019*
- **Algorithms and data structures of Tinkoff generation, parallel B** [↗](#) *2020 — 2021*
- **Republican Lyceum for Gifted Children, direction of training - InfoTech** [↗](#) *2019 — 2021*

## PROJECTS

---

- **Backend part of the application for monitoring the activity of remote employees** *in progress*  

Java Spring   PostgreSQL

  - In the application, the manager on the web client side could track the developer's workflow and progress reports. The developer receives instructions and reports through the desktop client.
  - Developed REST-api server for web client and desktop client.

## SKILLS

---

- Java Spring   PostgreSQL   C++   .net   Golang   Git   Docker
- Multi-threaded programming in Go Java and C++
- REST and gRPC
- Unit and Integration testing
- Software design patterns
- SOLID KISS DRY YAGNI
- Beginning level in Unix Operation Systems
- Strong knowledge of algorithms and data structures
